

Securing Your Digital Future

Enterprise Cybersecurity Solutions & Managed Security Services

Executive Overview

01

Who We Are

Trusted cybersecurity partner with
with 15+ years of experience
powering the Kingdom's digital
digital transformation

02

Our Services

End-to-end protection across all
all security layers: MSSP, SIEM,
threat detection, and GRC

03

Our Approach

Proven Identify-Deploy-Operate-
Operate-Remediate methodology
methodology that delivers
measurable results

04

Proven Results

Track record across government,
government, financial, telecom,
telecom, and energy sectors

01

Who We Are

Your Trusted Cybersecurity Partner in the Kingdom

About PathTECH

15+

Years of Excellence

A leading technical service provider based in Riyadh, Riyadh, Saudi Arabia, under the Path Tech umbrella umbrella

Vision 2030 Aligned

Delivering innovative technology solutions that power the Kingdom's digital transformation

Trusted Integrator

Strong partnerships with leading global vendors to deliver cutting-edge cybersecurity cybersecurity solutions nationwide

Certified Expertise

Team of certified cybersecurity engineers specializing in tailored enterprise security services security services

Why PathTECH?

End-to-End Security

From assessment to managed operations across all across all layers: User, Application, Network, Infrastructure, Data

Proven Track Record

Successful large-scale project delivery in Government, Financial, Telecom, and Energy sectors sectors

Certified Expert Team

Professional engineers with deep expertise across all cybersecurity domains and technologies

Global Technology Partners

Partnerships with leading international vendors for vendors for cutting-edge solutions and best practices

24/7 Managed Services

Round-the-clock SOC monitoring, threat detection, and incident response with SLA commitments

Regulatory Excellence

Deep expertise in SAMA, NCA, NESAs, ISO 27001, PCI-DSS, and regional compliance frameworks

02

Our Cybersecurity Services

End-to-End Protection for the Modern Enterprise

Our Service Portfolio

Three Integrated Pillars of Cybersecurity Excellence

Cybersecurity Services

- ▶ Advisory & Transformation
- ▶ Cyber Assurance
- ▶ Cyber Defense
- ▶ Awareness & Training
- ▶ Standards & Compliance

Cybersecurity Solutions

- ▶ Secure Identity & Auth
- ▶ Endpoint & Server Security
- ▶ Application Security
- ▶ Perimeter & Network
- ▶ Data Protection

Managed Security Services

- ▶ 24/7 SOC Operations
- ▶ SIEM-as-a-Service
- ▶ Managed XDR
- ▶ Threat Intelligence
- ▶ DFIR Services

Managed Security Services

24/7 Security Operations Center (SOC) — Your Always-On Defense

✓ 24/7 Monitoring & SIEM Administration

Real-time log correlation, event monitoring, and alert triage by certified analysts

✓ Threat Intelligence & Hunting

Proactive threat hunting using internal and external intelligence feeds

✓ Managed XDR

Extended detection and response across endpoint, network, and cloud environments

✓ Incident Management & DFIR

Digital forensics and incident response with SLA-backed commitments

✓ SIEM-as-a-Service

Fully managed SIEM platform without the operational overhead

Threat Detection & Response

Detect Faster. Respond Smarter. Minimize Impact.

Advanced SIEM Solutions

Centralized security event management with real-time correlation and automated response

Threat Intelligence Integration

Enrich detection with internal and external threat feeds for contextual awareness

Proactive Threat Hunting

Identify hidden threats before they escalate into breaches across your environment

Digital Forensics & IR

Rapid containment, evidence preservation, and root cause analysis when incidents occur

Brand Intelligence

Monitor for brand abuse, credential leaks, and reputational threats across the open web

Cyber Defense Solutions

Multi-Layer Protection Across Your Digital Estate

Secure Identity & Authentication

- IAM
- PAM
- MFA
- PKI
- SSO

Endpoint & Server Security

- EDR
- Patch Mgmt
- Vulnerability Mgmt
- MDM

Application Security

- WAF
- App Delivery
- Code Review
- Traffic Mgmt

Perimeter & Network

- NGFW
- IPS / VPN
- NAC
- DDoS Mitigation
- DNS Security

Data Protection

- DLP
- Encryption
- Disk Encryption
- DB Auditing
- DRM

Governance, Risk & Compliance

Navigate Regulatory Complexity with Confidence

Compliance Validation Services

Deep experience in local, regional, and international regulations

KEY FRAMEWORKS WE SUPPORT

SAMA	NCA	NESA	ISO 27001
PCI DSS	GDPR	NIST	CIS

ADVISORY SERVICES

- ▶ CISO Advisory & Strategic Consulting
- ▶ Cybersecurity Maturity Assessment
- ▶ Risk Management Framework Development
- ▶ Third-Party Risk Management

03

Our Approach

A Methodology Built on Results

The PathTECH Cyber Defense Framework

Identify → Deploy → Operate → Remediate

Security Layers

Comprehensive defense-in-depth strategy protecting every layer of your digital infrastructure — from the user to the data core.

The PathTECH Advantage

Turning Cybersecurity Investment into Business Value

75%

Reduce Risk

Comprehensive defense-in-depth strategy covering application-level vulnerabilities before before exploitation — the source of 75% of security breaches

100%

Ensure Compliance

Proven track record achieving SAMA, NCA, NESAS, and ISO certifications on time — keeping your organization audit-ready and regulator-confident

1 Team

Optimize Cost

Single integrated team combining expertise, expertise, integration, and 24x7 managed services — eliminating vendor fragmentation fragmentation and reducing total cost of ownership

04

Proven Results

Trusted by Industry Leaders Across the Kingdom

Industry Expertise

Deep Sector Knowledge. Proven Delivery. Lasting Partnerships.

Government

Securing critical national infrastructure and citizen data with full regulatory regulatory compliance and sovereign security requirements

Financial Services

Protecting banking and payment systems against advanced persistent threats, fraud, and regulatory scrutiny

Telecommunications

Securing network infrastructure and customer data at massive scale with scale with carrier-grade reliability and performance

Energy & Utilities

OT/ICS security for power generation, oil & gas, and water treatment facilities — protecting critical operational technology

Why Partner With PathTECH?

Six Compelling Reasons to Choose Us as Your Security Partner

1 Focused Expertise

Pure-play cybersecurity professional services company with dedicated focus on your security security outcomes

2 End-to-End Coverage

Complete security lifecycle from assessment and and design to implementation and managed operations

3 Proven Delivery

Large-scale project success in mission-critical environments across government and enterprise enterprise

4 Global Technology Access

Leading international vendor partnerships delivering delivering best-of-breed solutions tailored to your your needs

5 Sector Specialization

Deep experience in Financial, Telecom, Energy, and Energy, and Government sectors with tailored approaches

6 Journey Partnership

We take the full journey with you: assess, implement, manage, and continuously optimize optimize
