About PATHTECH

Over **30 Years** of Engineering and Technological Excellence

Based in Riyadh, Saudi Arabia, **PATHTECH** is a highly respected technical service provider operating as a specialized subsidiary under the prestigious **Path Industry** umbrella.

With solid experience in system integration, **PATHTECH** provides advanced technology solutions nationwide. As a trusted partner for global market leaders, our comprehensive roadmap directly supports the developmental pillars of **Saudi Vision 2030**.

Who We Are

We are a customer-centric technology and engineering partner dedicated to creating **reliable, secure, and scalable** ICT infrastructure solutions for public and private organizations.

01

Design

Architecting next-generation digital layouts aligned to leading global parameters.

02

Integration

Implementing multi-vendor configurations and software frameworks flawlessly.

03

Operations

Daily structural health maintenance, keeping vital pathways highly available.

04

Support

24/7/365 dedicated response protocols to resolve issues before impact occurs.

OUR VISION

"To firmly establish **PATHTECH** as the foremost and most trusted choice for delivering groundbreaking, state-of-the-art engineering and technology solutions, while consistently providing products and services that exceed the highest global quality standards."

OUR MISSION

"To provide responsible, efficient, and high-performance technology solutions that optimize operations, promote modern sustainability, and establish enduring partnerships with clients while upholding ethical values across all aspects of our business."

Commitment Parameters

- ✓ Maximize operational efficiency
- ✓ Foster technical sustainability
- ✓ Forge robust long-term relationships
- ✓ Ensure compliance & ethical growth

FIRST² Core Values

F

Fairness & Focus

Maintaining ultimate transparency with clients and associates, while keeping strategic focus on core goals.

**I**

Integrity & Innovation

Executing each process with uncompromising honesty while embracing groundbreaking modern technical shifts.

**R**

Results & Relationships

Striving for execution excellence while cultivating long-term, valuable partnerships across the ecosystem.

**S**

Simplicity & Self-Improvement

Solving complex tech challenges simply, and encouraging continuous structural education for our task forces.

**T**

Teamwork & Technology

Leveraging synergistic human potential powered by enterprise technological integration platforms.

? Why PATHTECH?

High Flexibility

Adapting rapidly to diverse structural shifts and tailored vendor adjustments.

Unique Value

Unwavering focus on delivering distinct solutions, exceeding operational goals.

Service Excellence

Rigorous service governance framework based on continuous assessment models.

Advanced Tech

Accessing next-generation innovations via deep connections inside tech markets.

Client-Oriented

Custom solutions planned perfectly around target enterprise structures.

Global Supply Chain

Unlocking access to premium hardware via a strong global network of partners.

Professional Staff

Certified engineers bringing deep tech expertise and high motivation to projects.

Area of Expertise

01

Networking & Collaboration

Comprehensive LAN/WAN topology configuration, switching protocols, wireless enterprise architectures, and unified communications.

02

IT Solutions

Data Center physical preparations, hyper-converged hardware setup, next-gen cybersecurity safeguards, and scalable cloud structures.

03

Consulting & PMO

Professional consulting services, enterprise workflow digitalization, and robust program support systems backed by Smartsheet.

04

Low Current Solutions

Comprehensive security camera (CCTV) layouts, advanced access control integrations, and smart audio-visual installations.

05

Managed Services

End-to-end technical support, comprehensive maintenance, and system operations to ensure minimal business downtime.

Solutions Portfolio

Networking Solutions

Cybersecurity Systems

PMO Consulting

Security Solutions

Active & Passive Network Solutions

Our comprehensive LAN and WAN topologies help organizations optimize their modern digital frameworks. We specialize in building secure, high-speed networks that enable rapid, seamless data transfers across all offices.

Scalable Network Foundations

Building next-generation corporate networks that ensure maximum uptime and support future growth.

- ✔ LAN / WAN Design
- ✔ Passive Networking
- ✔ Fiber Backbone
- ✔ Secure Connections
- ✔ Active Networking
- ✔ Structured Cabling
- ✔ Switching & Routing
- ✔ Documentation

Network Connectivity & Collaboration

Overcoming Physical Distance

We connect geographically dispersed offices and remote locations through a cohesive network infrastructure, ensuring seamless collaboration across all sites.

By integrating top-tier routing equipment and secure site-to-site VPN protocols, we deliver robust connectivity that ensures excellent performance, security, and high reliability.

High Availability

Multi-carrier load balancing options

Zero Congestion

QoS setups for priority video/audio traffic

Data Center Solutions

Meticulously Planned & Highly Resilient Foundations

At PATHTECH, we bring extreme precision to Data Center engineering. We build high-density server configurations designed to ensure non-stop operation.

We design every phase of development to support future scalability, helping clients maximize efficiency, reduce space requirements, and ensure long-term stability.

Data Center Services

- ✓ **Consultancy, Design & Certification:** Assisting in architectural designs and getting global standard alignment.
- ✓ **Prefab Data Center:** Delivering modular, deployable server environments.
- ✓ **Data Center Preparation:** Precision containment construction and architectural layouts.
- ✓ **Infrastructure Setup:** Installing reliable power grids, cooling systems, and physical server racks.
- ✓ **DCIM Deployment:** Real-time software management systems to monitor operational health.
- ✓ **IntelligentDC Enablement:** Incorporating smart AI alerts into core infrastructure layers.
- ✓ **Testing & Auditing:** Verification procedures to ensure reliable operations under high loads.
- ✓ **Resilience Assessment:** Audits designed to identify and resolve vulnerabilities.
- ✓ **Health Checks & Gap Analysis:** Evaluating existing setups to plan modern improvements.
- ✓ **O&M Maintenance Plans:** Complete support agreements covering preventive care and rapid recovery.

Cybersecurity

Our security practice helps organizations improve their resilience against cyber threats. Led by certified security architects, we deliver advanced threat mitigation defenses based on leading global vendor frameworks.

Endpoint Shielding

Segmentation

NGFW Firewall

Web Filtering

Endpoint Defense

Security Policies

IPS / IDS Systems

Secure VPNs

Microsegmentation

Dynamic SIEM

Low Current Solutions

PATHTECH delivers reliable low-current system integrations for major corporate facilities, campuses, and real estate developments.

We cover every phase from hardware selection, physical deployment, system programming, to clean and comprehensive network wire documentation.

Every installation is fully documented, ensuring easy maintenance and straightforward future expansion.

CCTV Systems

Smart Intercom

Structured Cabling

Enterprise UPS

Access Control

Public Address

Audio-Visual Setup

Server Rack Layouts

Video Conference & Smart Interactive Screens

Next-Generation Collaboration

We design and deliver interactive screens and video conferencing systems that transform corporate boardrooms and executive workspaces.

Our high-resolution interactive screens make collaboration intuitive, supporting instant screen sharing and clear, reliable remote communication.

Wireless Sharing

Zero-cable instant display mirroring

Crystal Audio

Acoustic beamforming and echo cancellation

Security Solutions

AI-Powered Video Analytics

In partnership with global security leaders, we build modern, AI-powered video analytics systems to secure large-scale sites, industrial plants, and public areas.

-  Instant threat alerts using AI analytics
-  Automated perimeter monitoring
-  License plate & facial recognition support

Project Management Consulting & PMO

We establish reliable Project Management Offices (PMO) to help organizations deliver complex technical projects successfully, on time and within budget.

Our methodologies optimize complex workflows, improve resource allocation, and enable clear executive progress reporting across all project stages.

REGIONAL PARTNERSHIP

PATHTECH is proud to serve as a distributor and solution partner for **Smartsheet** in the EMEA region.

PMO Deliverables

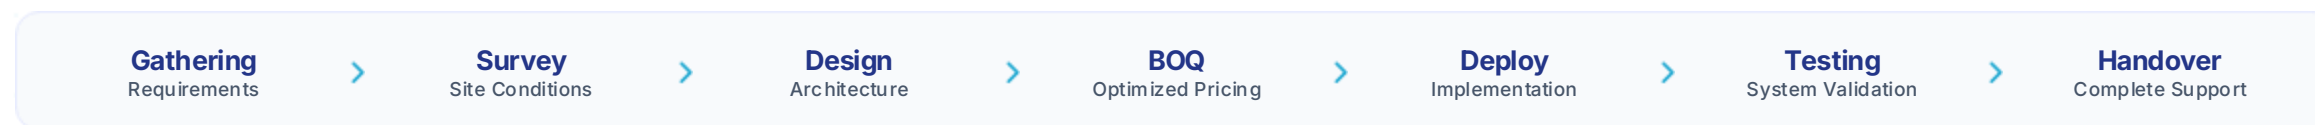

- ✓ Standardized project governance frameworks
- ✓ Resource planning & optimization models
- ✓ Real-time cost & schedule tracking
- ✓ Interactive executive dashboard setups
- ✓ Formal training programs for delivery staff
